Subject: Sampling Containers for GK Sample

Hi Steve and Craig,

I have gone through the coolers that are on site for the in depth sample requested.

Please note that the coolers have been on site for a long period of time with no custody seal, they were opened when they arrived as it was thought they would be used then.

Also there is moisture in one of the coolers, it does not appear to be from any of the persevered containers, I do not know where it originated.

With these thoughts in mind here are the quantities of what containers are on site:

- 3 – Coolers
- 12 – 1 Liter Amber Glass
- 6 – 250 mL Amber Glass
- 6 – 20 mL VOA with NaHSO₄H₂O

- 3 – 20 mL with CH₃OH
- 3 – 2 oz HDPE
- 3 – Tools
- 9 – 40 mL VOA with HCL
- 3 – 250 mL HDPE with HNO₃
- 3 – 125 mL HDPE
- 3 – 1 Liter HDPE with HNO₃
- 6 – 4 oz Glass
- 6 – 8 oz Glass

All the packing materials, chain of custody forms for Test America, and labels are in the coolers.

Thanks,

Elliott
